***Allowable Subject Matter***

1. Claims 3-9, 13-18 and 21-29 which have been renumbered as 1-22 respectively are allowed.

2. The following is an examiner's statement of reasons for allowance: Regarding claims 1-22, the prior art of record fails to teach of performing interference sensing at the mobile stations to identify interference-free uplink channels, transmitting from each mobile station a list of uplink channels that are identified as being acceptably interference-free and assigning at the base station an uplink channel to the mobile station. The closest reference, Chuang et al. (U. S. Patent No. 6,052,594), teaches of turning off pilot tones, paging the mobile station, requesting access, performing interference sensing at the base station to identify interference-free downlink channels, assigning, at the base station, a downlink traffic channel to the mobile station to receive the pending packets and transmitting the downlink channel assignment, but fails to teach of performing interference sensing at the mobile stations to identify interference-free uplink channels, transmitting from each mobile station a list of uplink channels that are identified as being acceptably interference-free and assigning at the base station an uplink channel to the mobile station.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
